BluePATH TECHNOLOGIES ENGINEERING SERVICES

BluePath guides the way.

In the Matrix family of services, BluePath Technologies, is another piece of the puzzle to complete all of your technology needs for a project of any size. BluePath offers a full range of engineering, design, and installation services for the telecommunications industry. BluePath's team offers turn-key solutions for fiber optic network installations, wireless broadband, computer cabling and surveillance & security.

BluePath has the expertise, experience and resources to assist in the most cost effective design, build, maintenance and operation of all systems. Our reputation is based upon our highly skilled and reliable engineering and technical solutions.

The continuous need for voice, data, video, and surveillance services arise due to expansions, relocation, protection, or market demand. In today's communications environment, whether it is engineering, maintenance, audit, documentation, wireline, wireless or fiber systems, BluePath provides a wide spectrum of innovative solutions while completing your projects in an efficient and economical manner.

Some of our greatest experiences have come from clients who we have built a long-lasting relationships with – clients as diverse as our services, including Verizon, Rutgers University, Cable & Wireless, Connecticut DOT, Qwest Communications, Cablevision, Bloomberg LP, and Hennes & Mauritz (HGH), Lighttower, and NYCHA.

Key Project Experience

- New Fiber Path, New State Police Headquarters, West Trenton, NJ
- Verizon – Fiber to the premises (65 projects), NJ, NY, PA, VA
- QWEST – New Fiber Optic Cable install, Englewood Cliffs, NJ
- Level 3 Communication Design, Engineering and Construction Management, CT, FL, GA, NY
- Hennes & Mauritz (HGH), Data, Voice, CCTV Network Design and Installation, Distribution and Retail Locations, CA, IL, NY, NJ;
Related properties, In-building Distributed Antenna Systems, Co, NY

Services provided

- Broadband Wireless Services
- Fiber Optic Networks
- Computer Cabling
- Building Systems Automation & Integration
- Surveillance & Security
- Intrastate Long-haul Network Design
- Distributed Antenna Systems
- Equipment Migrations
- Directional Bore Designs
- Route Planning
- Information Technology Consultations
- Feasibility Studies
- Design & Installation
- Fiber Splicing & Testing
